

westbo of sweden

“ Make a warming Swedish stove the centre of your house. Or as we say– The dream of the past. Now. ”

When it gets cold in Sweden, people retreat into their homes. The whole family gathers around the warming fireplace. In Sweden we count about one hundred rainy days per year and the average temperature is below +10°C.

The Westbo stove creates warmth and cosiness inside each and every house. The century old tradition of Swedish stove manufacturing inspires us at Westbo of Sweden. We know that it is not only the warming value of the stove that matters, but also that the stove is a characterising furnishing element, the appearance and feeling makes an essential role in creating a home.

The electrical or bioethanol stoves from Westbo of Sweden are easy to use, easy to move and have no installation costs. The flames of the electric versions looks very natural and the investment in a cast iron stove will give you much pleasure and a value for money.

Westbo Classic electric

- Westbo of Sweden -

Westbo Classic

- electric -

With its stylish and elegant appearance, the Westbo Classic has its roots in the 19th century. The first of its predecessors was manufactured in Bornholm, around 1890. The stove became so well-known and popular due to its efficiency and form, that it could be found all over Sweden.

Our remake of the stove surprises the user with a modern interior and quick heating by just a click on the remote control.

The Westbo Classic is made of cast iron and provides a royal feeling.

Westbo Victoria

- electric/bio-ethanol -

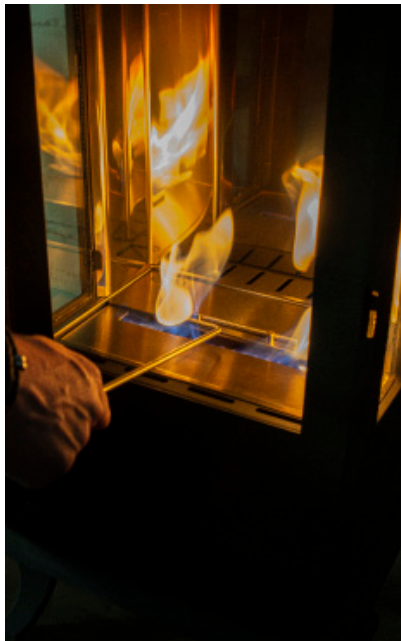

The Westbo Victoria is made from cast iron and is accented with beautiful Art nouveau ornament. The decor and the traditional styling are combined with a large window that extends to the sides to give a stunning wide-angle view of the flames.

With its standing format the stove makes a unique feature in any room and it is both beautiful and practical. On the electric version the crown of the stove is removable, hiding an electric hot plate, suitable for cooking.

The Westbo Victoria is exclusive and carries on a rich tradition of cast iron stoves manufactured in Sweden.

Westbo Carl bio-ethanol

Westbo Carl electric

Westbo Carl electric

- Westbo of Sweden -

Westbo Carl

- electric/bio-ethanol -

The Westbo Carl is a traditional Swedish cast iron stove. In the past it was placed in small rooms or workplaces with little space and with the need for warmth. The handy stove is easy to place where the space is limited.

The Westbo Carl is available in both bioethanol and electrical version. On the electric version the crown of the stove is removable, hiding an electric hot plate, suitable for cooking.

- Westbo of Sweden -

Westbo Ignis

- electric -

Westbo Ignis is our electric fire. You place the Ignis inside your fireplace or stove and simply light the flames with the push of a button. Very easy to install and use.

Westbo Ignis is perfect to use in your stove during summertime when it is too warm for heating, but you still want to cuddle up in front of the fire.

Available in two variants; with vertical wood or horizontal wood.

Westbo Ignis
