# Our history

---

Westbo of Sweden is a small, family-owned cast iron stove factory. The head office is located in the charming village of Reftele, about 200 km north of Malmö. It is a quiet town where the Gunnarsson family established a manufactory producing cast iron stoves, today run by the second generation.

In its current form, the factory has been in existence since 1992, while the tradition of making cookers dates back as far as the 19th century. The exemplary Westbo Classic model had many predecessors, the first of which was manufactured in 1890 in Bornholm.

The cooker became popular for its efficiency and form. It could be found all over Sweden.

In our factory in Reftele, classic cast iron stoves and cookers of typical Swedish models are designed and manufactured. The prototypes of the currently available models are old cookers from Scandinavian foundries. They are the inspiration for the style presented by Westbo of Sweden – elegant and timeless.

In Reftele, we manufacture around six thousand stoves each year. The stoves find their way to distributors not only in Europe, but also in other parts of the world.

---

- Westbo of Sweden -

# Westbo Classic

---

With its stylish and elegant appearance, the Westbo Classic has its roots in the 19th century. The first of its predecessors was manufactured in Bornholm, around 1890. The stove became well-known and popular due to the efficiency and form, and it could be found all over Sweden at that time.

Our remake surprises the user with a modern interior. The product offers the highest level of comfort thanks to its efficient thermal output and environmentally friendly combustion. A massive cast iron core stores the heat of the Westbo Classic and a steel sheath surrounds the core. In addition to the cast iron core, we offer a heat storage. This construction with convection gives quick distribution of heat in a room.

The Westbo Classic is made of cast iron and provides you with a royal feeling.

---

# Westbo Classic variations

---

Design your own Westbo Classic. You can choose from many additional parts and different colours and combine it with your ideal accessories. Choose between:

- Two different heights: 2.06 m or 1.96 m.
- With or without a crown.
- Black-painted or with enamelled sheath in off-white, matt black, vermont blue, royal green or wine red.
- Decorated stove door or simply a glass panel without ornaments.
- Polished details.
- Emblem with the classic animal of Småland, the lion.

# Westbo Victoria

---

The Westbo Victoria series is made of cast iron and accented with beautiful Art Nouveau ornaments.

The decor and the traditional styling combined with a large viewing window with extension to the sides, gives a stunning wide-angle view of the flames. The stoves make a unique feature in any room and are both beautiful and practical. All Westbo Victoria models are equipped with a cooking plate for heating casseroles or boiling a kettle. The stove can be connected to external combustion air.

The Westbo Victoria series carries on a rich tradition of cast iron stoves manufactured in Sweden.

# Westbo Victoria

## 100 & 125

---

The largest stove in the Victoria family is the Victoria 125. With a cast iron weight of 180 kg, it is a reliable source of heat. The second of the family, and the most popular, is the Victoria 100. Small and compact, it fits very well into most rooms. The view of the fire in both models is almost unlimited. They are available with or without left/right side glass. These versions have a top heating plate that can be used to warm up a meal. This models could be connected with an adapter for back/top connection.

# Westbo Victoria 85 & 85L

---

The Westbo Victoria 85 is a traditional Scandinavian stove. Its design and floral decoration gives it a unique look. The 85L model is our widest model and the older sister of the Victoria 85. The 85 and 85L models differ in width. Both models are equipped with a top heating plate. The cookers are available in different versions, with or without left/right side glass. They can be connected backwards or upwards with an additional adapter.

# Westbo WeRa

## M1 & M2

---

Westbo WeRa is a small stove with a powerful reliable heat. The WeRa is a real energy saver. Thanks to its simple design but high performance, the stove catches the eye with its very simple appearance. The Westbo WeRa has a sturdy cast iron body and solid, high-quality bricks in the combustion chamber, this guarantees efficient and environmentally friendly combustion. The stove guarantees excellent thermal efficiency, and is available in two sizes, WeRa M1 and M2.

# Westbo Nobel

---

Straight lines and a minimalistic design shapes the Nobel, all inspired from Scandinavia. From three sides of the stove, you get a great view of the fire. The stove can be connected both top and rear to the chimney. The Nobel is equipped with a cooking plate on top and the stove is just stylish, simple, and practical. Nobel is also available without side windows.

---

- Westbo of Sweden -

# Westbo Standard/ Ornament

---

A traditional cast iron stove in classic Swedish design. This stove could be found in every Swedish kitchen in the past - and still is. This stove is an extra heating source and a nostalgic centrepiece for every kitchen. It is also an additional appliance for cooking and baking. The Westbo Standard is available in four different appearances, ornament/standard, with or without glass door.

The following accessories are available:

- An optional window in the furnace door provides a view on the fire.
- The stove can be built in as well as freestanding on a cast iron tripod.
- Copper tank.

---

- Westbo of Sweden -

# Westbo 300

---

The Westbo 300 is a sturdy cooking stove, ideal for any kitchen, measuring only 30 cm wide. It includes a cooking plate and serves as a comfortable source of extra heat in the home. Powerful, efficient and slim, it fits in various environments. Westbo 300 is modelled on the traditional Scandinavian cooking stove.
